

glass cleaner

No. 50 GLASS CLEANER is guaranteed to leave no film. Easy to use -- simply spray and wipe with a clean dry cloth. Dirt, greasy grit and grime are quickly dissolved from windows, mirrors, windshields or any glass surface.

SW050

DOES NOT CONTAIN silicone or ammonia. It does contain perfume-grade alcohols, which are the best cleaning agent ingredients as they have the lowest risk of adverse interaction with other materials. The alcohol has a quick evaporation rate, which keeps it from leaving a film and adversely interacting with materials surrounding the surface to be cleaned.

SW050 GLASS CLEANER has a heavy duty foam, that clings and penetrates to break up soils and dissolve smudges, film, smears, fingerprints, etc.

No dripping • No running • No streaking

No rinsing is needed, simply wipe with a clean, dry cloth. Leaves a fresh, pleasant scent.

FOR USE ON:

- WINDOWS
- MIRRORS
- WINDSHIELDS
- GLASS SURFACES
